Proposed response to the Institute of Occupational Health's
proposal to include ETS on the list of carcinogens.

Attached is a draft of the first two sections of a proposed response drafted by Shook, Hardy and Bacon. As you can see these two sections deal with the scientific and technical issues involved. I expect to receive a draft of section 3 today; section 3 will address the public policy issues involved in classifying ETS as a carcinogen. I will forward a copy of section 3 as soon as it becomes available.

I reviewed sections 1 and 2 last evening and requested certain changes which are reflected in the draft you are receiving. Since time is of the essence, I would suggest that you contact Jim Newsom or me with recommended revisions, and we will forward them to the drafting team at Shook, Hardy. Thank you.

Best personal regards,

Sincerely,

Anthony J. Andrade
